

Southern Solar Summit
August 26th Savannah, GA
September 3rd Atlanta, GA

Welcome

Solar is working all over the world!
It works exceedingly well here in
Georgia.

- We have great Sun!
- Over 5 solar sun hours per day everyday.

- We have great Sun!
- Over 5 solar sun hours per day everyday.

Our goal today is to inform,
educate, connect and inspire
1,000 new solar energy systems
in GA and the Southeast by 2010.

We can significantly reduce costs
and environmental impact

We can be a regional leader – in quality jobs, training, education, manufacturing, development, design, and installation.

Just like PCs, Cell Phones and the
Internet...

Green Energy is a Natural Choice

Now it's easier than ever to support environmentally friendly energy generation from sources like the sun, wind, water, and biomass. Just sign up for Georgia Power's Green Energy program and help bring more renewable power to Georgia.

Georgia Power's Green Energy is certified Green-e Energy by the Center for Resource Solutions. [View the Green-e Energy Product Content Label.](#)

Make a difference with Green Energy

By participating in Georgia Power's Green Energy program, you continue to get the reliable energy you need while doing something positive about the environment. Your Green Energy choice will:

- Potentially reduce the environmental impact of energy production
- Conserve our natural resources
- Support domestic energy self-reliance

Green Energy is regulated by the Georgia Public Service Commission and is Green-e Energy certified. Green-e Energy provides independent, third-party certification to ensure certified renewable energy meets strict environmental and consumer protection standards. More than 175 companies throughout the United States participate in the certification program.

How it works

Help Improve the Environment without Leaving the House

Join a growing community of Georgians who have found a simple and easy way to help our environment with Green Energy from Georgia Power.

Your commitment to Georgia Power's Green Energy Program helps support the use and development of green energy sources within our area.
